Also suitable for weaning to re-mating period.

- **Proteins** - No urea, all protein in the form of true proteins sources
- **Energy** - To assist with growth
- **Trace Mineral Premix** - To assist in maintaining nutritional balance and sow health
- **Pellet** - easier acceptance and intake by sows
- **Clearly Identifiable Bags** - Avoids using the wrong product
- **25 Kg Easy Lift Bag** - For your safety also available in bulk and bulk bsgs

Other Specialty Products

- Weaner / Creep
- Weaner
- Grower
- Breeder
- Lactating Sow

General Information

Pre-Farrowing

- Introduce sows to feed prior to farrowing (usually 5 - 6 days)
- Estimated feeding level to be approximately 2.00 kg per day + roughage e.g. chaff

Farrowing / Lactation

- Feed ad-lib

Weaning / Re-mating

- Ideally split daily feeding level, twice per day (approximately 2.00 Kg)
- If body condition is sufficient, Pig Breeder can be used during this period

- *Above feeding programs are intended as a guide only*
 - *Ensure that cool, clean and accessible water is available at all times*
 - *For optimal health, ensure areas are hygienic, well ventilated but draught free, protection against extreme weather conditions, wasted feed removed daily. Implements an animal health management program, adequate feeder space and avoid over crowding.*
 - *Roughage source prior to farrowing to assist in preventing constipation*
 - *Additional additives can be added, conditions apply. Contact mill for more details.*
