EQUINE SHOW & CONDITIONER

Typical Analysis* (90% DM basis / Kg)	As Fed
Digestible Energy MJ/Kg	13.00
Protein (%)	17.00
Calcium (%)	1.10
Phosphorus (%)	0.60
Magnesium (%)	0.35
Sodium (%)	0.60
Chloride (%)	0.80
Lysine (%)	0.80
Methionine (%)	0.30
Sugars (%)	3.00
Starch (%)	17.00
Crude Fibre (% max)	15.00
Fat (% max)	6.00
Added Vit A IU/Kg	18,000
Added Vit D3 IU/Kg	4,000
Added Vit E IU/Kg	350
Added Vit B1 mg/Kg	5.00
Added Vit B2 mg/Kg	9.00

Added Vit B3 mg/Kg	50.00
Added Vit B5 ug/Kg	20.00
Added Vit B6 mg/Kg	6.00
Added Folic Acid mg/Kg	1.70
Added Biotin mg/Kg	1.50
Added Cobalt mg/Kg	0.65
Added Copper mg/Kg	85.00
Added Magnesium gr/Kg	3.50
Added Manganese mg/Kg	140
Added Selenium mg/Kg	0.40
Added Zinc mg/Kg	160

Equine Show & Conditioner

Has been specifically formulated to suit the needs of all showing horses and /or those wishing to maintain or improve body condition. Correct equine nutrition will assist in maintaining, improving wellbeing, tone and coat condition, giving you the upper hand in today's competitive competitions.

Typical raw materials considered in the formulation of this diet

Steamed Barley, Bran & Pollard, Lupin, Canola & Soybean Meal, Vegetable Oils, Amino Acids, Probiotics, Prebiotic, Limestone, Dicalcium Phosphate, Magnesium Oxide, Species Specific Vitamin Premix, Salt, Natural Betaine, Antioxidant & Mycotoxin Binder

Showing & Coat Conditioning.

- Suggested feeding levels of 2.00 - 3.00kg per day, varied to suit the horses energy demands. Levels of pellets, should not exceed 1% of horses live body weight. *e.g. 500 kg horse x 1% = 5 kg*

Weight Gain:

- Suggested pellet feeding levels will be dependant on the level of desired weight gain and level of activity, generally speaking for 500 kg horse with a moderate exercise program requiring moderate weight gain a feed level of 2.50 - 3.50kg per day would be suitable
- Suggested feeding levels are intended as a guide only, ensure adequate clean, cool water and roughage as pasture and or hay is available at all times.*
- Daily roughage intake should make up no less than 1.0% (minimum) -1.50% (ideal) of pony/horse, live body weight to assist in maintaining healthy gut function.*
- Pellets fed at levels equal to or greater than 1% of pony/horses live body weight should be fed over two or more feeds per day.*
- Feeding levels dependent on the availability of other feeds, body condition and rate of metabolism*
- Introduce new feeds or changes gradually over a 10 -14 day period.*
- For any additional information please contact Peter Harvey 0400 445 998 or peterh@thevellagroul.com.au*

**Typical analysis utilises some book values that are outside of standard testing procedures. Natural raw materials by nature may vary slightly, hence the analysis stated is an average.*
