## EQUINE SHOW & CONDITIONER

Typical Analysis* (90% DM basis / Kg)		As Fed
Digestible Energy	MJ/Kg	13.00
Protein	(%)	17.00
Calcium	(%)	1.20
Phosphorus	(%)	0.70
Magnesium	(%)	0.60
Sodium	(%)	0.60
Chloride	(%)	0.80
Lysine	(%)	0.80
Methionine	(%)	0.30
Sugars	(% max)	2.00
Starch	(% max)	17.00
Crude Fibre	(% max)	15.00
Fat	(% max)	5.50
Added Vit A	IU/Kg	17,000
Added Vit D3	IU/Kg	3,500
Added Vit E	IU/Kg	340
Added Vit B1	mg/Kg	4.50
Added Vit B2	mg/Kg	8.50

Added Vit B3	mg/Kg	45.00
Added Vit B5	ug/Kg	20.00
Added Vit B6	mg/Kg	5.50
Added Folic Acid	mg/Kg	1.65
Added Biotin	mg/Kg	1.50
Added Cobalt	mg/Kg	0.60
Added Copper	mg/Kg	.00
Added Manganese	mg/Kg	130
Added Selenium	mg/Kg	0.40
Added Zinc	mg/Kg	160
Added Vit C	IU/Kg	600

### Equine Show & Conditioner

Has been specifically formulated to suit the needs of all showing horses and /or those wishing to maintain or improve body condition. Correct equine nutrition will assist in maintaining, improving wellbeing, tone and coat condition, giving you the upper hand in today's competitive competitions.

### Typical raw materials considered in the formulation of this diet

Steamed Barley, Bran & Pollard, Lupin, Canola & Soybean Meal, Vegetable Oils, Amino Acids, Probiotics, Prebiotic, Limestone, Dicalcium Phosphate, Magnesium Oxide, Species Specific Vitamin Premix, Salt, Natural Betaine, Antioxidant & Mycotoxin Binder

### Showing & Coat Conditioning.

- Suggested feeding levels of 2.00 - 3.00kg per day, varied to suit the horse's energy demands. Levels of pellets, should not exceed 1% of horse's live body weight. *e.g. 500 kg horse x 1% = 5 kg*

### Weight Gain:

- Suggested pellet feeding levels will be dependant on the level of desired weight gain and level of activity, generally speaking for 500 kg horse with a moderate exercise program requiring moderate weight gain a feed level of 2.50 - 3.50kg per day would be suitable
- Suggested feeding levels are intended as a guide only, ensure adequate clean, cool water and roughage as pasture and or hay is available at all times.*
- Daily roughage intake should make up no less than 1.0% (minimum) -1.50% (ideal) of pony/horse, live body weight to assist in maintaining healthy gut function.*
- Pellets fed at levels equal to or greater than 1% of pony/horse's live body weight should be fed over two or more feeds per day.*
- Feeding levels dependent on the availability of other feeds, body condition and rate of metabolism*
- Introduce new feeds or changes gradually over a 10 -14 day period.*
- For any additional information please contact Peter Harvey 0400 445 998 or peterh@thevellagroul.com.au*

*\*Typical analysis utilises some book values that are outside of standard testing procedures. Natural raw materials by nature may vary slightly, hence the analysis stated is an average.*
