

EQUINE SHOW & CONDITIONER

Typical Minimum Analysis	Dry Matter
Digestible Energy	13.85
Protein (%)	17.50
Calcium (%)	1.10
Phosphorus (%)	0.60
Magnesium (%)	0.32
Sodium (%)	0.55
Chloride (%)	0.65
Lysine (%)	0.80
Methionine (%)	0.40
Sugars (%)	5.00
Starch (%)	30.00
Fibre (%) (Max)	10.00
Fat (%) (Max)	6.00
Added Vit A IU/Kg	12,200
Added Vit D3 IU/Kg	2,400
Added Vit E mg/Kg	45
Added Vit B2 mg/Kg	5.50

Added Vit B6 mg/Kg	3.00
Added Vit B12 ug/Kg	0.30
Added Niacin mg/Kg	20.00
Added Biotin mg/Kg	1.10
Added Folic Acid mg/Kg	1.35
Added Betaine gr/Kg	1.10
Added Zinc mg/Kg	165.00
Added Manganese mg/Kg	100.00
Added Copper mg/Kg	55.00
Added Cobalt mg/Kg	0.65

Equine Show & Conditioner

Has been specifically formulated to suit the needs of all showing horses and /or those wishing to maintain or improve body condition. Correct equine nutrition will assist in maintaining, improving wellbeing, tone and coat condition, giving you the upper hand in today's competitive competitions.

Typical raw materials considered in the formulation of this diet

Steamed Barley, Bran & Pollard, Lupins, Canola & Soybean Meal, Vegetable Oils, Amino Acids, Probiotics, Prebiotics, Calcium, Phosphorus, Species Specific Vitamin Premix, Salt, Sodium Bentonite, Natural Betaine, Antioxidant

All raw materials used are steamed cooked prior to the pelleting process.

Showing & Coat Conditioning.

- Suggested feeding levels of 2.00 - 4.00kg per day, varied to suit the horse's energy demands. Levels of pellets, should not exceed 1% of horse's live body weight. *e.g. 500 kg horse x 1% = 5 kg*

Weight Gain:

- Suggested pellet feeding levels will be dependant on the level of desired weight gain and level of activity, generally speaking for 500 kg horse with a moderate exercise program requiring moderate weight gain a feed level of 3.00 - 4.00 kg per day would be suitable
- Suggested feeding levels are intended as a guide only, ensure adequate clean, cool water and roughage as pasture and or hay is available at all times.*
- Daily roughage intake should make up no less than 1.0% (minimum) -1.50% (ideal) of pony/horse, live body weight to assist in maintaining healthy gut function.*
- Pellets fed at levels equal to or greater than 1% of pony/horse's live body weight should be fed over two or more feeds per day.*
- Feeding levels dependent on the availability of other feeds, body condition and rate of metabolism*
- Introduce new feeds or changes gradually over a 10 -14 day period.*
- For any additional information please contact Peter Harvey 0400 445 998 or peterh@thevellagroup.com.au*
