- **Natural Betaine** - Support chicks during times of heat stress
- **Vegetable Proteins** - No restricted animal materials (RAM) used in our diets
- **Vitamins** - Species specific vitamins & minerals included to support health and production
- **Antioxidant** - Assist health
- **No** added hormones or antibiotics used

Typical raw materials considered in the formulation of this diet

Australian cereal grains & their Co-Products, Corn, Lupin, Canola & Soybean Meal, Lucerne Meal, Vegetable Oils, Amino Acids, Probiotics, Prebiotics, Calcium, Phosphorus, Vitamin Premix, Salt, Sodium Bicarbonate, Sodium Bentonite, Natural Betaine, Antioxidant, Regano (Herbal Coccidiostat), Emzymes

All raw materials used are steamed conditioned prior to the pelleting process

General Information

- A complete diet available in a crumble form, providing essential nutrients for growing domestic meat birds
- Fresh, clean water to be accessible at all times, to aid suitable intake
- Phase supplementary feeding both in and out gradually to help avoid set backs
- Water & feed should be available 24 / 7
- A herbal coccidiostat has been added to assist in the control of Coccidiosis, no withholding period
- Growth rates will vary according to a range of external factors including housing, variable weather conditions, predators, inoculations and hygiene to name a few
- For first two weeks of age we suggest the uses of a water soluble vitamin in their water to aid less dominant chicks that may not get their desired intake of the feed
- For advanced nutritional specifications please email your request to peterh@thevellagroup.com.au
