PIG BREEDER

Typical Analysis	As Fed	Dry Matter
Energy DE/ kg	12.60	14.15
Protein (%)	14.00	15.73
Calcium (%)	1.30	1.46
Phosphorus (%)	0.40	0.45
Fibre (%)	5.60	6.29
Added Salt (%)	<0.40	

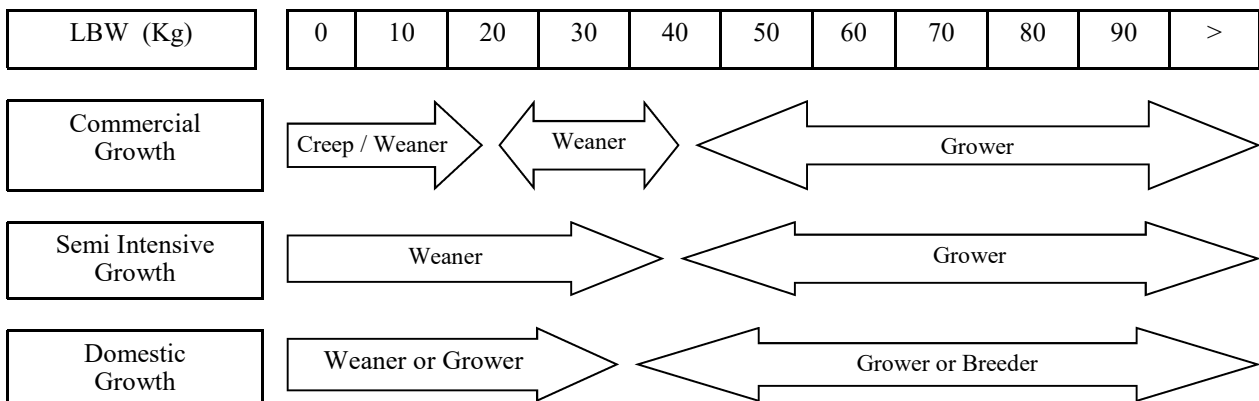

TRACE MINERAL PREMIX ADDED. FOR MORE DETAILED ANALYSIS PLEASE CONTACT VELLA STOCK FEEDS.

Pig Breeder has been formulated as a commercial ration to suit breeding sows and boars.

Typical raw materials considered in the formulation of this diet

Wheat, Barley, Sorghum & their Co-Products, Lupins, Corn, Canola & Soybean Meal, Lucerne Meal, Vegetable Oils, Amino Acids, Calcium, Phosphorus, Vitamin Premix, Salt, Sodium Bicarbonate, Sodium Bentonite, Molasses, Digestive Enzymes
 All raw materials used are steamed cooked prior to the pelleting process

- **Proteins** - No urea, all protein in the form of true proteins sources
- **Energy** - To assist with growth
- **Trace Mineral Premix** - To assist in maintaining nutritional balance and health
- **Steam Conditioned** - All ingredients steam conditioned prior to pelleting to assist with nutrient uptake
- **RAM Free** - No "Restricted Animal Material" (RAM) use in our diets

- Feeding levels will vary according to body condition score and desired weight gains required.
- *Above feeding programs are intended as a guide only*
- *Blend new feeds with current feeds for a smooth transition so as to avoid set backs*
- *Ensure that cool, clean and accessible water is available at all times*
- *For optimal growth and animal health, ensure areas are hygienic, well ventilated but draught free, protection against extreme weather conditions, wasted feed removed daily. Implements an animal health management program, adequate feeder space and avoid over crowding.*
- *Additional additives can be added, conditions apply. Contact mill for more details.*
